

Learning Through Collaborative Design Professional Development (PD) Research Project

Recruiting Control Group Teachers NOW!

Goal

- To support ambitious teaching practices that enhances student thinking and learning through talk

Benefits

- **By participating in this project**, delivered by nationally recognized science education researchers and PD experts, **teachers will come away with a collection of resources, materials, and activities** that they can immediately use in their classrooms
- Control teachers will engage in a **year-long** research study and PD that includes:
 - 36 hrs of PD in the summer of 2022 (Optional)
 - Data collection around four biology or environmental science lessons during the 2021/2022 school year (\$250/teacher)
 - Pre and post teacher surveys (\$100/teacher)
